-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 28 November 2005.
- 2a) This action is FINAL.                    2b) This action is non-final.

Applicants' traverse of the restriction requirement has been considered, but is not deemed persuasive. Applicants' argument, that the subject matter among the groups is not independent and distinct, is not convincing, since applicants have not pointed out why the reasons given for restriction would be erroneous. Applicants' argument, that different classifications are not independent adequate grounds for restriction, is not convincing, since the requirement does not rely upon the different classifications as the basis for restriction. Accordingly the restriction requirement is made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Shaffer et al '009. Shaffer et al '009 discloses a boron nitride agglomerated powder, and teaches at col. 1, lines 20-27 that the agglomerates are formed by treating turbostratic boron nitride at high temperature, typically between about 1800 to 1900 C. Such high temperature treatment would inherently result in a boron nitride agglomerated powder having an agglomerate fracture

Art Unit: 1754

strength to tap density ratio not less than about 11 ~~Mg/ccg~~, since it is apparent from Paragraph [0037] of applicants' specification that sintering of the feedstock powder will result in such ratio of agglomerate fracture strength to tap density.

The other references are made of record for disclosing agglomerated boron nitride.
